Dear Authors,

Welcome to Ayurveda Medical Sciences!

It is with immense pleasure, the Editorial team of Journal of Ayurveda Medical Sciences (Abbreviated as J Ayu Med Sci), announces launching first issue. The science of Ayurveda has become the focus of great interest around the globe and many research efforts are being made to probe its different aspects in the light of the contemporary scientific advances. We felt there is need for more journals to publish the results of such studies and to serve as platform for exchange of ideas. This motivated us to initiate this refereed, indexed, peer reviewed, open access, quarterly journal for rapid publication of Ayurveda and

other traditional medicine research.

We shall strive to attain and maintain high standards of publication based on rigorous peer review system. The emphasis would be on quality and the focus is on promoting research articles in this field especially those undertaken from Ayurvedic or traditional medical system perspective. J Ayu Med Sci is Journal of original and scientific information on Ayurveda and all Traditional and complementary therapies practiced worldwide. Manuscripts providing experimental evidences for the science behind Ayurveda, Yoga & Naturopathy, Siddha, Homeopathy, Unani and Folk medicine are the top priorities. Original research articles on ethnobotany, pharmacognosy, phytochemistry, standardisation, quality control, pharmacology & toxicology and clinical trials of drugs from all the aforesaid traditional medical sciences will be considered for publication. Other than original articles, information in the form of editorial, case report, short communication, review article, letter to editor etc will be made available online on acceptance by peer review. The results of the research must be obtained employing internationally acceptable experimental protocols supported by appropriate statistical analysis. Manuscripts are accepted with the understanding that the authors have not violated any ethical practice followed in preparation and publication of biomedical manuscripts. Author/s is/are responsible for all the statements made in their work and should be willing to defend them publicly, if challenged. Every article will be scanned for plagiarism before accepting it for publication. The editors may reject/request revision of the manuscript for plagiarism before passing it to peer review.

I would like to place on records my deep appreciation to Dr KN Sunil Kumar (Executive Editor) whose untiring efforts and networking were mainly responsible for bringing out this journal in the present format. I appreciate Dr Galib (Associate Editor) for his meticulous approach to editing of manuscripts towards perfection. Thanks to all Editorial Board members for their support. My special thanks to Dr Mueen Ahmed (Publication partner), Phcog.Net and E-manuscript services, who is responsible for management of quality of JAMS website.

It is my duty to thank all the authors of the articles being published in this issue for their immediate response to our invitation. Any suggestions to improve the quality of the journal are welcome. We request the research and academic fraternity to utilize the services of this journal by providing constant in puts and generous subscription.
